...in tune with the times

The Howard Combo Organ

is the wild and wonderful newcomer to the Baldwin family. Find out for yourself why Baldwin's destined to be the "top hit" with the modern musicmaker.

The new Howard has the musical muscle for today's big beat. And with the Baldwin Amplifier, it's an even greater performer. Here's why...

It's versatile... for all those driving new sounds, nine distinctive stops that can be used individually or in combination. Four vibrato effects. Exciting tonal variety multiplied by Baldwin Amplifier tone controls including exclusive Supersound.

It's two-channel and solid state... the big, dynamic combo sounds—sharp and crisp. Full, rich bass and distinct and varied treble amplified individually.

It's complete... 61-note extended keyboard, including 24 bass notes for full chords. Push-pull coupler to add pitches an octave higher and lower. Separate tone controls to balance bass and treble individually.

It's portable... just 64 pounds, and it packs up in a flash into one compact case.

It's good looking... black vinyl snapped up with blue accents, brushed chrome legs. And it's as sturdy as it's stylish.
